

Assembly Instructions: LPH Illuminated Poster Holder

Components

1x screwdriver

4x tiny screws

2x wall mount fixings

2x wall screws

2x wall plugs

2x feet

1x mains Adaptor

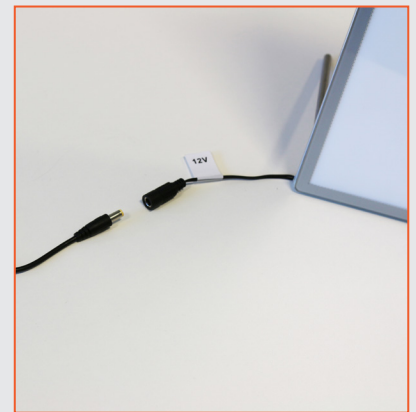

1x frame

Freestanding

1. Screw both legs into the back of the frame, using any of the holes on the outer edges of the frame. Use different combinations of holes in order to achieve the preferred orientation and angle for your display.

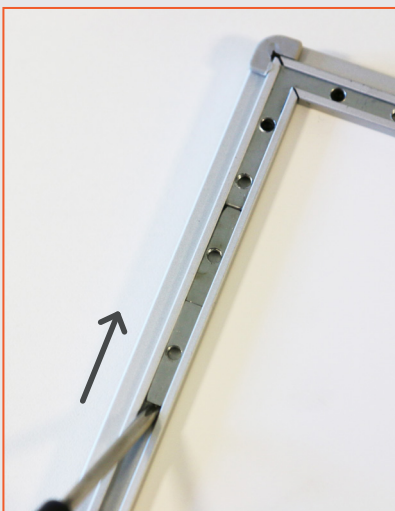

2. Connect the frame to the mains adaptor power cable to illuminate your display.

Wall mounting

1. Lay the frame face down in your preferred orientation. Use a small screwdriver, or other thin instrument, to push the two built-in slide fixtures to the top of each side of the frame.

2. Align each of the wall mount fixings to the built-in slide fixtures and attach using the 4 tiny screws. Tighten with the supplied screwdriver. The frame is now ready to mount on your wall using the supplied wall screws and plugs. Connect the frame to the mains adaptor power cable to illuminate your display.
