

Wobbler strip assembly instructions

In this bag you should receive:

10 x Roundels (**item 1**)

10 x Wobbler strips (**item 2**)

To assemble the wobbler, remove the protective tape from one of the adhesive pads on the wobbler strip and stick to the back of roundel as shown below in **image 1**.

This is best done by laying the wobbler strip down with the adhesive pad facing up and placing the roundel on to it. This will allow you to make sure that it is stuck on straight. The wobbler performs best when the pad is stuck to the roundel as high as possible as per **image 2**.

Then remove the protective tape from the second adhesive pad and stick the wobbler to the surface it is to be displayed from as per **image 3**.
