

Product Instructions **Corner Gridwall Kits**

Included:

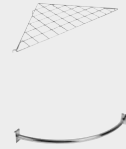

- 2 x Gridwall Panels

- 2 x Joining clips

- Fixings

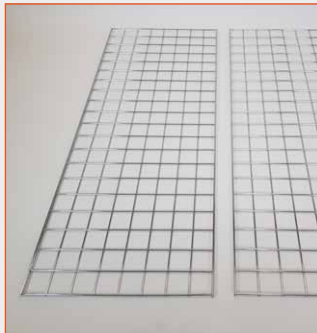

- Gridwall Components (dependant on kit purchased)

How to apply

1.

Lay the two gridwall panels side by side approximately one inch apart (ideally on the floor).

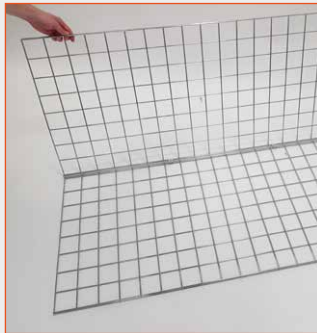

2.

Connect the gridwall panels together using the joining clips; ensuring that you only tighten the screws finger-tight at this point. Maintain even spacing between the joining clips, and connect them to the lower outer rods on each gridwall panel.

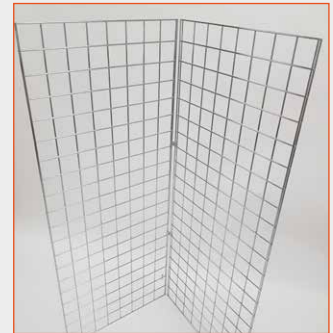

3.

Lift up one side of the gridwall before standing the display upright (this may require two people).

4.

With the two gridwall panels at 90° to one another, tighten the joining clips with a screwdriver to lock the panels in position.

5.

Gridwall shelves, rails and other accessories can now be fitted to the display.
